OVERVIEW OF THE CERTIFICATION PROCESS

The Bureau of Indian Standards operates product certification under the BIS Act 2016 and the BIS Conformity Assessment Regulations 2018. Domestic manufacturers follow the Normal Procedure (Scheme I) or the Simplified Procedure for small entities. Foreign manufacturers follow the Foreign Manufacturers Certification Scheme (FMCS).

STEP-BY-STEP APPLICATION (NORMAL PROCEDURE)

1. Submit application on the BIS portal with fees and factory details. 2. BIS officer audits the factory: process, quality control and test facilities. 3. Samples are drawn and tested in BIS-recognised laboratories. 4. If the factory audit and test results conform, BIS grants a licence. 5. The licence holder may apply the ISI mark on conforming product. The Simplified Procedure grants provisional licence based on self-test reports with independent testing, followed by factory audit within 90 days.

DOCUMENTS REQUIRED FROM THE MANUFACTURER

Typical documents: factory registration proof, manufacturing process flow chart, list of machinery and test equipment, calibration certificates of test equipment, quality control plan, layout plan of the factory, trademark registration, and test reports from BIS-recognised labs. Exact requirements depend on the product's Indian Standard.

SCHEME OF TESTING AND INSPECTION

The Scheme of Testing and Inspection (STI) defines the frequency of tests, sampling plan and records the licensee must maintain. The licensee must test each lot per the STI, maintain records for at least three years, and permit BIS inspection and surveillance visits.

FEES AND VALIDITY

Application and licence fees are prescribed in the BIS Conformity Assessment Regulations 2018; consult the official BIS portal for the current fee schedule. A licence is normally valid for two years and renewable for further periods subject to continued conformity and surveillance.

MARKING REQUIREMENTS

Every certified product must carry the ISI mark together with the licence number (CM/L format), the Indian Standard number on a single line below the mark, and any product-specific markings required by the applicable Indian Standard.
